# Israel Andrew Brown

Art Director | Film Director | NPR Generalist | A.I Film Prompt Engineer

**Contact Information:****Location:**

Jamaica W.I.

Email: israelandrewbrown@proton.me

Website: israelandrewbrown.com

**Awards and Recognition:**

- JCDC Gold - Visual Arts Competition
- Cecil Cooper Foundation Bursary
- Heart NTA/TVET Scholarship
- Chase Scholarship

**Skills:**

- Story Development (Ollama) (OpenWebUI)
- Deepseek R1

**Concept Development (Comfy UI)**

- Image Generation (Stable Diffusion 1.5)
- Image Generation (Flux 1 Schnell)

**Audio Development (Pinokio)**

- Expressive Voiceover (zonos-tts)
- Music Production (audio-to-audio) (YuE)
- Sound Effects (Stable Audio Open 1.0)

**Prop Development**

- Photogrammetry (Meshroom)
- 3D Model Reconstruction (Hunyuan3D 2.0)
- Texturing (Stable Projector)
- Krita v5.3

**Motion Capture Development**

- Blender v3.0-v4.0
- Face Landmarker Link V0.2
- FreeMoCap v1.5

**Hobbies and Interests:**

- Chess
- Culinary Arts

**Who Am I?**

I, Israel Andrew Brown, am a dedicated creative professional specializing in art direction, film direction, Non-photorealistic Art, and Artificially Generated Art. My passion lies in transforming ideas into visually compelling and functional designs and film that tell stories, solve problems, and inspire innovation.

**Artist Statement**

I am driven by a vision to educate and empower others through the integration of open-source tools, software and artificial intelligence (edge A.I.) in creative industries. By leveraging these technologies, I aim to make high-quality design resources more accessible and foster a community of innovators who embrace technology to redefine artistic boundaries.

**Qualifications**

- Bachelor of Fine Arts in Animation (expected graduation: 2027)  
Edna Manley College of the Visual and Performing Arts
- Associate of Arts in Humanities – Visual Communication (expected: 2025)  
Caribbean Examination Council (CXC)
- Associate of Science – Industrial Technology (expected: 2025)  
Caribbean Examination Council (CXC)
- Associate of Science – Information and Communication Technology (expected: 2025)  
Caribbean Examination Council (CXC)

**Core Values and Philosophy**

I am passionate about advocating for the use of free and open-source software (FOSS) as a cornerstone of creativity, education, and innovation. By championing tools like FreeMoCap, Blender, and Krita, I aim to demonstrate the power of accessible software in filmmaking, animation, and design education. These tools provide opportunities for creators to explore their potential without financial barriers, fostering a culture of inclusivity and collaboration.

**Key Accomplishments**

I look forward to contributing to the creative community by developing educational resources, participating in collaborative projects, and showcasing how open-source tools can revolutionize artistic workflows.

**Professional Goals**

- To refine my expertise in animation, graphic design, and 3D modeling through academic and practical experiences.
- To become a leading advocate for the integration of open-source tools in creative education and professional practices.
- To establish workshops and online platforms that empower individuals to use tools like Blender, FreeMoCap, and Krita for their creative pursuits
- To collaborate with global communities in developing innovative projects that merge art, technology, and storytelling.

Made with "Krita 5.3"

**“(ANM00) Animation - Artificially Generated Film Production”**

Programme : Animation Film Production  
 Department : Film  
 Prerequisite : CSEC® (Literature, Visual Arts, Theatre Arts, Music, Technical Drawing)  
 (CAPE® Performing Arts Unit 1 and 2 or satisfactory demo-reel/interview)  
 Type Of Course : Animation  
 Course Title : “Animation - Artificially Generated Animation Film Production”  
 Course Code : ANM00  
 Credits : 3  
 Year : Four (4)  
 Semester : Two (2)  
 Duration : 1 Semester, 15 weeks, 60 hrs (3 hrs per week)

Lecture Redistributor : Israel Andrew Brown  
 Email : [israelandrewbrown@proton.me](mailto:israelandrewbrown@proton.me)  
 Website : <https://github.com/israelandrewbrown/AGAFP>

Rationale :  
 . This course addresses the growing need for digital professionals who can  
 . integrate A.I. tools into traditional filmmaking workflows, preparing students for  
 . an industry increasingly reliant on AI-enhanced production pipelines while  
 . maintaining core storytelling and technical animation skills.

Description :  
 This course leverages State of The Art (SoTA) free and open-source artificial intelligence models and software to produce an animated short film. Building on foundational film composition (storytelling, storyboarding, animatics, and video editing skills), students will learn methods in artificial digital asset generation. Understand and utilize 3D animation production techniques to effectively create, modify and compose artificially generated digital assets into a film. Troubleshoot common AI-related issues in animation film production.

Required Equipment: Laptop (≤16gb ram) (≤256gb ssd), e-Mouse, Microphone, ≤50 mbps internet, room,

Optional Equipment : GPU, Graphics Tablet, Graphics Pencil, HDMI-HDMI Cable, Video Capture Card, 4 WebCam, 4 USB Cable, 3 Three Tripods, 1 Charuco Board, 1 Helmet (relevant) Edge A.I. () (NVIDIA® GeForce® RTX ≤8gb) (MacOS [M1][M2][M3][M4])

Objectives :

1. Understand and utilize 3D animation production techniques to effectively generate, modify, & compose artificially generated digital assets into film.
2. Understand how artificial intelligence models can address and resolve inefficiencies in 3D animation pipelines, improving overall productivity.
3. Identify, analyze, and resolve common issues arising from the use of artificial intelligence in film production.
4. Understand the limitations of automation in animation and film production, recognizing which roles are more challenging to automate and why.

Course Assessment: Please note, knowledge gained from this course will be assessed in the “(PRJ00) Project – Individual Project” by its receptive examiner.

This course material is intended for educational use and is based on the author's current understanding of the subject matter. While the author has taken reasonable steps to ensure the accuracy of the information presented, the rapidly evolving nature of artificial intelligence and film production means that some details may become outdated. The information in this book is distributed on an “As Is” basis without warranty. While every precaution has been taken in the preparation of the book, the author shall not have any liability to any person or entity with respect to any loss or damage caused or alleged to be caused directly or indirectly by the instructions contained in this book or by the operating systems, large language models, image diffusion models, computer vision models, computer software and hardware products described in it.

**Week One**

What is a film? What is “animation” and “twelve principles of animation”? What is “perspective”?  
 What is the “animation pipeline”, labor/skill? What are the occupations on the “animation pipeline”?  
 How to make “paper”/“charcoal” from wood? How to make a “bone flute”? How is “bronze” forged?

**Week Two**

What is an algorithm? What is “Artificial Intelligence”? What is “software user documentation”?  
 What is a Large Language Model (LLM)? What is stable diffusion? What is cv / pose detection?  
 What is the “Chain-of-Thought” and “Zero-shot” generation? What is a ControlNet? What is a Lora?  
 What is a computer? What is an operating system? What is hardware and software?  
 What is “free and open source”? What are free and open source software licenses?  
 Why are file formats; [(.txt)(.jpeg)(.stl)(.usd)(.ogg)(.FLAC)(.srt)(.glb)(.csv)(.openEXR)(.mkv)] used?  
 What are references? What is “Glaze” software used for? What is “digital-watermarking”?

What is a “production-meeting”? What is creative “control” and “freedom”? What is “trial-and-error”.  
 What is “Edge Artificial Intelligence”? How to set up an “Edge Artificial Intelligence” workstation?  
 How to install relevant “free and open-source” models? Eg. “[pinokio.computer](https://pinokio.computer)” or “[pinokio.co](https://pinokio.co)”

(WebUI[Gradio]) (ComfyUI) (ollama)

**Week Three**

(Lecture) Story Development  
 (Tutorial) Character / Story Structure

(OpenWebUI [deepseek-R1-MoT])

**Week Four**

(Lecture) Concept Development  
 (Tutorial) Visual Concept [Characters][Props][Set] (Flux-1-Schnell) (Qwen-Image)

**Week Five-to-Six**

(Lecture) Audio Development  
 (Tutorial) Expressive Voice Over (VC/tts/csm) (chatterbox-VC)(zonos-v0.1-tts)(csm)  
 (Tutorial) Subtitles (Whisper-v3)  
 (Tutorial) Music Design (Audio-to-Audio) (YuE<sup>ICL</sup>)(DiffRhythm<sup>ICL</sup>)(ACE-Step<sup>ICL</sup>)  
 (Tutorial) Split Instrumentals/Vocal (Ultimate-Vocal-Remover-V5)  
 (Tutorial) Audio-to-MIDI (NeuralNote[Spotify-Basic-Pitch])  
 (Tutorial) Sound Effects (Stable-Audio-Open-1.0) (MMAudio)

**Week Seven-Eight**

(Lecture) Composition Development (what-ai-cannot-do) (Blender 4.0) (Krita 5.2)  
 (Tutorial) (Animatics, FX, 2DFX[Fog, Smoke/Fire, Water], VFX Compositing, Video Editing)

**Week Nine**

(Lecture) Prop Development  
 (Tutorial) Image-to-3dMesh [Characters][Props][Set] (Hunyuan3D-2.1) (Ultra3D) (TripoSG)  
 (Tutorial) Image-to-Map-to-3dMesh [Set] (Hunyuan-World-1.0)

**Week Ten**

(Lecture) Look Development  
 (Tutorial) Image Texture Generation[Characters][Props][Set] (Stable Diffusion-2.1)

**Week Eleven-Thirteen**

(Lecture) Motion Development  
 (Lecture) Traditional-Concepts-Through-Computer-Animation  
 (Tutorial) “Face” - Motion Capture (FaceLandmarkLink-V0.23)  
 (Tutorial) “Body” - Motion Capture (FreeMoCap-v1.5)

**Week Fourteen :**

(Lecture) Motion Development (cont'd)  
 (Tutorial) “Face/Body” - Pose Detection (t2v i2v v2v) (Wan 2.1-VACE-DepthAnything-V2-DWPose-14b)

**Week Fifteen :**

(Critique) Showcase and review of completed projects.

**Course Review** : <https://github.com/israelandrewbrown/AGAFP>

“The Ten Essential Roles On The New Pipeline”	
<b>Producer</b>	A producer guides a film from its beginning to its completion. They have a hand in organizing and scheduling, budgeting and hiring, creative problem-solving and overseeing, and marketing and distributing. A producer may be a self-employed contractor, or subject to the authority of an employer such as a production company or studio. They are involved throughout all phases of production from inception to completion. <a href="#">&lt;citation&gt;</a>
<b>Director</b>	This person is responsible for designing sets, overseeing construction workers and other artists, and playing a part in figuring out the overall aesthetic of a movie production. <a href="#">&lt;citation&gt;</a> .
<b>Technical Artist</b>	This person (Programmer) helps video game development teams create interactive, visually appealing games for consoles and apps. They use both artistic and coding skills to integrate artwork and animation into complex game systems and film. <a href="#">&lt;citation&gt;</a> .
<b>Artificial Intelligence Operator [Story] [Concept] [Audio] [Prop] [Look] [Movement]</b>	This (Developer) is a professional who designs, trains, and monitors AI systems. They work as a liaison between human operators and AI systems, ensuring that AI systems are integrated into existing workflows. <a href="#">&lt;citation&gt;</a> .
<b>Layout-Artist / Animatic-Artist</b>	This person creates animatics, which are sequences of images, shots, or sketches that are used to plan a video. Animatics are used in many fields, including animation, television commercials, and movie production. Animatics are a technique that comes after storyboarding, and they can help ensure that a project is on track and will be effective. They can be used to: see how the final product might look. Give a rough draft of how a particular idea will play out. Animatics are usually made by editing storyboard images together with dialogue, sound effects, and music. <a href="#">&lt;citation&gt;</a>
<b>VFX Compositing Artist</b>	This is the last piece of the puzzle you need to make effects look realistic. It combines the work of animators, videographers, and special effects artists to create effects that blur lines. <a href="#">&lt;citation&gt;</a> .
<b>Video Editor</b>	This person uses scenes, takes, and shots to create a cohesive story for the screen. Editors use continuity editing, cutaways, and transitions to evoke certain emotions from the viewer and properly execute an entertaining plot. Video editors for film cut a scene from different angles, which directs the viewer to certain details in a story. <a href="#">&lt;citation&gt;</a> .
<b>Graphic Designer</b>	Graphic designers create visual concepts, using computer software or by hand, to communicate ideas that inspire, inform, and captivate consumers. <a href="#">&lt;citation&gt;</a>
<b>Attorney-At-Law [Lawyer]</b>	A lawyer (also called attorney, counsel, or counselor) is a licensed professional who advises and represents others in legal matters. Today's lawyer can be young or old, male or female. Nearly one-third of all lawyers are under thirty-five years old. Almost half of the law students today are women, and women may ultimately be as numerous in the profession as men. <a href="#">&lt;citation&gt;</a>
<b>Accountant</b>	An accountant is a financial professional who reviews and analyses financial records and keeps track of a company's or individual's income, expenditures, and liabilities. An accountant may also work in project planning, cost analysis, auditing, and financial decision-making. Some specialize in tax preparation and tax planning. Accountants may work for large companies or external accounting firms. They must meet state-specific educational and testing requirements and are certified by national professional associations. <a href="#">&lt;citation&gt;</a>

**(PRJ00) Project – Individual Project****Individual Short Film (1minutes - 15minutes)****Pre-Production, Production and Post-production, Marketing and Distribution.**

Students may also be granted an extension to finish their project during the summer semester.  
By Group or Individually produce a short film. This Project has five (5) sections.  
The Project at completion would contain the following.

**Section One - Pre-production**

1. Research Paper
  2. Treatment (Author, Title, Log-line, Synopsis, Characters)
  3. Screenplay (three-act-structure) (Standard Formatting) (must use screenplay software)
  4. Concept Art (characters - three [ $\leq 3$ ])
    - action poses,
    - face expressions,
    - turnarounds,
    - displaying the twelve [12] principles of animation.
  - Concept Art (props)
  - Concept Art (environments)
  5. Shot List (scene no., shot no., shot type, shot descr., camera movement, Location)
  6. Storyboard (colour coded characters, direct of movement, camera movement)
  7. Story-Beats
  8. Animatic (panel/keyframe, camera movement, sound effects and expressive voiceover)
  9. Expenditure (Gantt-Chart, Human resources, Software/Equipment and Budget)
  10. Pitch (Presentation for "Summary Of Pre-production")
- [Greenlight Statement (Proof-Of-Funding)]

**Section Two - Production**

Files of the following artificially generated digital assets:

- |   |                          |
|---|--------------------------|
| 1. Assets - (Text-Concept)  | (.txt)(.fountain)        |
| 2. Assets - (Visual-Concept)  | (.jpeg)                  |
| 3. Assets - (Expressive Voiceover, Subtitles, Sound Effects, Music)   | (.FLAC)(.srt)            |
| 4. Assets - (Character-Prop-Environment)                              | (.usd)(.stl)(.glb)       |
| 5. Assets - (PBRTTextures [Character-Prop-Environment])               | (.usd)(.stl)(.glb)(.ply) |
| 6. Assets - (Motion Capture Data [Input data, output data])           | (.csv)                   |
| 7. Assets - (Shots of Short Film and Credits Sequence)( $\leq 1$ min) | (.exr) (.mkv)            |

**Section Three - Post-production**

1. Modification of "artificially generated digital assets".
2. Composition of "artificially generated digital assets" into a complete film.
3. Utilization of FX, 2DFX, VFX, to enhance film composition.
4. Arrangement of film through video editing and color grading.
5. Presentation of film

**Section Four - Marketing**

1. Brand Identity
2. Poster (YouTube Thumbnail) (Cover Art) (Title Card)
3. Studio Website (Home, About, Contact [Studio and Workers], Blog, Merch [optional])
4. Credits Sequence (video and spreadsheet)
5. Grant, Direct-Promotion, Indirect-Promotion, Rebate, Tax-Credit.

**Section Five - Distribution**

[Optional Distribution through Film Festival]

YouTube® Channel Creation - Upload in order

1. Teaser - Title Card (Thirty [10] seconds)
2. Teaser (Ten-Thirty [10-30] seconds)
3. Trailer (one [1] minute - three [3] minutes)
4. Behind-the-scenes Documentary (<7 minutes)
  - a. Teaser at the beginning and title card at end
  - b. Footage of some of the work being done.
  - c. Processes and visual breakdown of artificially generated digital assets.
  - d. Interview of the project manager/director/lecturer.
5. Completed Short Film (1-15 minutes)

There should be five (5) videos on the channel or profile at completion.
