INDEPENDENT ANIMATION FILM PRODUCTION

Artificially Generated Animation Film Production
(Non-Photorealistic Rendering [NPR])
(Titan Edition)

Written by
Israel Andrew Brown
email: israelandrewbrown@gmail.com

Israel Andrew Brown

Art Director | Film Director | NPR Generalist | A.I Film Prompt Engineer

Who Am I?

I, Israel Andrew Brown, am a dedicated creative professional specializing in art direction, film direction, Non-photorealistic Art, and Artificially Generated Art. My passion lies in transforming ideas into visually compelling and functional designs and film that tell stories, solve problems, and inspire innovation.

Artist Statement

I am driven by a vision to educate and empower others through the integration of open-source tools, software and artificial intelligence (edge A.I.) in creative industries. By leveraging these technologies, I aim to make high-quality design resources more accessible and foster a community of innovators who embrace technology to redefine artistic boundaries.

Qualifications

- Bachelor of Fine Arts in Animation (expected graduation: 2027)
Edna Manley College of the Visual and Performing Arts
- Associate of Arts in Humanities – Visual Communication (expected: 2025)
Caribbean Examination Council (CXC)
- Associate of Science – Industrial Technology (expected: 2025)
Caribbean Examination Council (CXC)
- Associate of Science – Information and Communication Technology (expected: 2025)
Caribbean Examination Council (CXC)

Core Values and Philosophy

I am passionate about advocating for the use of free and open-source software (FOSS) as a cornerstone of creativity, education, and innovation. By championing tools like FreeMoCap, Blender, and Krita, I aim to demonstrate the power of accessible software in filmmaking, animation, and design education. These tools provide opportunities for creators to explore their potential without financial barriers, fostering a culture of inclusivity and collaboration.

Key Accomplishments

I look forward to contributing to the creative community by developing educational resources, participating in collaborative projects, and showcasing how open-source tools can revolutionize artistic workflows.

Professional Goals

- To refine my expertise in animation, graphic design, and 3D modeling through academic and practical experiences.
- To become a leading advocate for the integration of open-source tools in creative education and professional practices.
- To establish workshops and online platforms that empower individuals to use tools like Blender, FreeMoCap, and Krita for their creative pursuits
- To collaborate with global communities in developing innovative projects that merge art, technology, and storytelling.

Contact Information:

Location:

Albion District, St. Thomas, Jamaica W.I.

Email: israelandrewbrown@gmail.com

Website: israelandrewbrown.com

Awards and Recognition:

- JCDC Gold - Visual Arts Competition
- Cecil Cooper Foundation Bursary
- Heart NTA/TVET Scholarship
- Chase Scholarship

Skills:

Story Development (Ollama) (OpenWebUI)

- Deepseek R1

Concept Development (Comfy UI)

- Image Generation (Stable Diffusion 1.5)
- Image Generation (Flux 1 Schnell)

Audio Development (Pinokio)

- Expressive Voiceover (zonos-its)
- Music Production (audio-to-audio) (YUE)
- Sound Effects (Stable Audio Open 1.0)

Prop Development

- Photogrammetry (Meshroom)
- 3D Model Reconstruction (Hunyuan3D 2.0)
- Texturing (Stable Projector)
- Krita v5.3

Motion Capture Development

- Blender v3.0-v4.0
- Face Landmarker Link V0.2
- FreeMoCap v1.5

Hobbies and Interests:

- Chess
- Culinary Arts

Made with "Krita 5.3"

(ANM00) Animation - Artificially Generated Film Production

Programme	: Independent Animation Film Production
Department	: Film
Prerequisite	: CSEC® (Literature, Visual Arts, Theatre Arts, Music, Technical Drawing)
Type Of Course	: Animation
Course Title	: “Animation - Artificially Generated Film Production”
Course Code	: (ANM00)
Credits	: 3
Year	: Four (4)
Semester	: Two (2)
Duration	: 1 Semester, 15 weeks, 60 hrs (3 hrs per week)
Lecture Redistributor	: Israel Andrew Brown / Email: israelandrewbrown@gmail.com
Website.	: github.com/israelandrewbrown/Artificially-Generated-Animation-Film-Production
Description	: This course leverages free and open-source artificial intelligence models and software to produce an animated short film. Building on foundational film composition (storytelling, storyboarding, animatics, and video editing skills), students will learn methods in artificial digital asset generation. Explore AI's role in streamlining 3D animation production pipelines. Understand and utilize 3D animation production techniques to effectively create, manage and compose artificially generated digital assets into a film. Troubleshoot common AI-related issues in animation film production.
Required Material	: Laptop, Graphics Tablet, Graphics Pencil, <50 mbps internet, Studio Room 4 WebCam, 4 USB Cable, 3 Three Tripods, 1 Charuco Board, 1 Helmet (relevant) HDMI-HDMI Cable, Video Capture Card, Edge A.I. (NVIDIA® Project DIGITS® [2025])

Objectives

1. Understand and utilize 3D animation production techniques to effectively generate, manage, & compose artificially generated digital assets into a film.
2. Understand how artificial intelligence models can address and resolve inefficiencies in 3D animation pipelines, improving overall productivity. Cultivate creative experimentation and visual expression in digital visual arts, leveraging AI-driven tools to enhance artistic vision.
3. Identify, analyze, and resolve common issues arising from the use of artificial intelligence in film production. Understand the limitations of automation in animation and film production, recognizing which roles are more challenging to automate and why.

Course Assessment: Please note, knowledge gained from this course will be assessed in the ...
“(PRJ00) Project – Individual Project” by its receptive examiner.

Donate Bitcoin : [bc1q9md7cv6hx3pw4e940054myj37g3wdax7032ts9](https://blockchain.info/address/bc1q9md7cv6hx3pw4e940054myj37g3wdax7032ts9)

This course material is intended for educational use and is based on the author's current understanding of the subject matter. While the author has taken reasonable steps to ensure the accuracy of the information presented, the rapidly evolving nature of artificial intelligence and film production means that some details may become outdated. The information in this book is distributed on an “As Is” basis without warranty. While every precaution has been taken in the preparation of the book, the author shall not have any liability to any person or entity with respect to any loss or damage caused or alleged to be caused directly or indirectly by the instructions contained in this book or by the operating systems, large language models, image diffusion models, computer vision models, computer software and hardware products described in it.

Week One

What is a film? What is “animation” and “twelve principles of animation”? What is perspective? What is the “animation pipeline”? What are the occupations on the “animation pipeline”?

Week Two

What is an algorithm? What is “Artificial Intelligence”?
 What is a Large Language Model (LLM)? What is stable diffusion? What is computer vision?
 What is a workstation? What is an operating system? What is hardware and software?
 What is “free and open source”? What are free and open source software licenses?
 What are the file formats [(.jpeg) (.usd) (.FLAC) (.srt) (.csv) (.openEXR) (.mkv)] used for?
 What hardware and software are used in an “A.I.” workstation?

Week Three

How to set up an “Artificial Intelligence” workstation? (Nvidia® Project DIGITS® [May 2025])
 How to install relevant free and open source models and software? ([Ollama] [pinokio.computer])

Week Four-Five

(Lecture) Composition Development (what-ai-cannot-do) (Blender 4.0) (Krita 5.2)
 (Tutorial) (Animatics, VFX Compositing, Video Editing)

Week Six

(Lecture) Story Development (WebUI [Gradio])
 (Tutorial) Character / Story Structure (deepseek R1)

Week Seven

(Lecture) Concept Development
 (Tutorial) Concept [Characters][Props][Set] (Flux 1-Schnell)

Week Eight

(Lecture) Prop Development
 (Tutorial) Image-to-3d Mesh [Characters][Props][Set] (Hunyuan 3D 2.0) (Trellis)
 (Tutorial) Image-to-Depth-to-3dMesh [Set] (DepthAnythingV2)

Week Nine

(Lecture) Look Development
 (Tutorial) ImageTexture Generation [Characters][Props][Set] (Stable Diffusion 2.1)

Week Ten

(Lecture) Audio Development
 (Tutorial) Expressive Voice Over (Text-to-Speech) (zonos-v0.1)
 (Tutorial) Subtitles (Whisper)
 (Tutorial) Music Production (Audio-to-Audio) (YuE^{ICL})
 (Tutorial) Separate Instrumentals/Vocals (Ultimate Vocal Remover)
 (Tutorial) Sound Effects (Stable Audio Open 1.0)

Week Eleven

(Lecture) Motion Development
 (Tutorial) “Face” - Motion Capture (FaceLandmarkerLinkV0.2)
 (Tutorial) “Body” - Motion Capture (FreeMoCap v1.5)

Week Twelve to Fifteen :

(Tutorial) Using AI to optimize the creation of a short film production.
 (Tutorial) Troubleshooting common AI-related issues.
 (Critique) Showcase and review of completed projects.

“The Six Essential Roles On The New Pipeline”

Art director is responsible for designing sets, overseeing construction workers and other artists, and playing a part in figuring out the overall aesthetic of a movie production.

A **Technical Artist** (Programmer) helps video game development teams create interactive, visually appealing games for consoles and apps. They use both artistic and coding skills to integrate artwork and animation into complex game systems and film.

Artificial Intelligence Operator is a professional who designs, trains, and monitors AI systems. They work as a liaison between human operators and AI systems, ensuring that AI systems are integrated into existing workflows.	Story Developer
	Concept Developer
	Props Developer
	Look Development
	Audio Developer
	Movement Developer

An **animatic artist** creates animatics, which are sequences of images, shots, or sketches that are used to plan a video. Animatics are used in many fields, including animation, television commercials, and movie production. Animatics are a technique that comes after storyboarding, and they can help ensure that a project is on track and will be effective. They can be used to: see how the final product might look. Determine if any changes are necessary. Give a rough draft of how a particular idea will play out. Animatics are usually made by editing storyboard images together with sound, dialogue, sound effects, and music

VFX Compositing artists is the last piece of the puzzle you need to make effects look realistic. It combines the work of animators, videographers, and special effects artists to create effects that blur the line between fiction and reality.

A **video editor** is an artist who uses their artistic and organizational skills to create video content for entertainment or marketing purposes: Video editors use editing software to combine video footage, sound, and graphics to create a finished video. They may also add transitions, effects, and graphics, and adjust color and audio. Video editors need visual aesthetic skills, a sense of pacing, and attention to detail. They also need to be able to ensure that the final video matches the director's vision and audience interests.
